## **DETAILED ACTION**

### ***Drawings***

1. The drawings were received on 11/08/05. These drawings are accepted.

### ***Allowable Subject Matter***

2. Claims 2-6 allowed.
3. The following is an examiner's statement of reasons for allowance:

For claim 6, none of the prior art teach singularly or in combination a method for controlling a test bench for an internal combustion engine connected on a drive side to a dynamometer brake and intended as a drive engine of a vehicle whereby a vehicle model and a driving profile for the vehicle are preset through a test bench computer and whereby the internal combustion engine runs through identical operating points as in a preset driving cycle corresponding to the vehicle model and set point defaults of the control units of the internal combustion engine and the dynamometric brake as determined by test bench design, comprising the sequential steps of determining parameters of the set point defaults by operating the internal combustion engine in a measuring phase, inputting the parameters as initial parameters in the test bench computer, running the internal combustion engine in an actual test run, and monitoring
